2	Grants by State	3
3	Terminated and Reinstated Grants	5
4	New Grants	13
5	Continuing Grants	15
6	Currently Active Grants	17
7	Methods	18

1 Introduction

This report presents an overview of recent trends in NIH grant terminations, reinstatements, new grant initiations, and continuations. It includes breakdowns by recipient institution and state.

Information on terminated grants comes from the NIH Rescinded Grants Database, maintained by Drs. Noam Ross and Scott Delaney. They collect data from self-report, news reports, the HHS TAGGS system, DOGE.gov, USASpending.gov, NIH's Twitter feed, and NIH RePORTER.

This report distinguishes between the following grant types.

- *R Series*: These grants fund **independent research projects** led by a principal investigator. These are the most common types of NIH grants. Funding goes towards research aims rather than training or career development.
- *T Series*: These grants go to **institutions** to support **training programs** for undergraduate, graduate, and postdoctoral researchers. A single T grant will support multiple trainees. These grants fund stipends, tuition, and training activities (e.g. courses, workshops, conferences).
- *Individual Training / Fellowships (F Series)*: These are research **training grants for individuals**, rather than institutions. The goal of these grants is to help predoctoral and postdoctoral trainees gain skills needed for a successful research career.
- *Early Career (K Series)*: These are grants for **individual researchers** (usually postdocs or early-career faculty) to help them become independent scientists. They provide salary support and research funding.

For resources and more information about these data, see the Methods section at the bottom of this document.

This report was created by Emma Mairson. For inquiries about this report, please contact Grant Watch at info@grant-watch.us or message us on Signal at [sdelaney.84](https://signal.me/#/sdelaney.84).

2 Grants by State

The following table breaks down active, terminated, reinstated, and new grants by state.

Ever terminated grants include all grants that were terminated at any point in time, regardless of whether they were later reinstated. Currently terminated grants exclude any grants that have been reinstated.

“Lost funding” is the amount of funding awarded to grants that was not paid out because of terminations. Percentages reflect the share of grants of that type in each state that have been terminated.

“Lost funding” and the values listed under “Number of grants terminated (%)” exclude reinstated grants.

So far, the total lost funding across all US states and DC is approximately **\$2,204,880,000**.

Grants by State											
State	Active	Ever Term.	Curr. Term.	Reinst.	New	Cont.	Lost Funding (USD)	Number of Grants Terminated (%)			
								R Series	T Series	Early Career	Indiv. Train.

Wyoming	31	0	0	0	1	6	0	0 (0)	NA	NA	NA

Note:

NA = Not applicable; this state had no grants of this type, so terminations could not occur.

3 Terminated and Reinstated Grants

Number of confirmed terminated grants this week: **29** of 2,961 ever terminated and 2,039 currently terminated.

- R series: 0
- T series: 0
- Early career: 1
- Individual training: 0
- Reinstated: 0

The following table shows terminated grants by week, as listed in the “termination_date” field in the NIH Rescinded Grants Database. This field approximates a grant’s date of termination based on the following sources: the termination date in the HHS TAGGS Terminated grants PDF; the self-reported termination date; and other signals from RePORTER and HHS TAGGS.

Ever terminated grants include all grants that were terminated in a given week, regardless of whether they were later reinstated. Currently terminated grants exclude any grants that have been reinstated. Reinstated grants are counted in the week they were estimated to be reinstated, not the week they were initially terminated.

Terminated Grants by Week							
Week	Ever Term.	Cur. Term.	Reinstated	R Series	T Series	Early Career	Indiv. Training

University of Pittsburgh at Pittsburgh	8	Massachusetts General Hospital	43
Lundquist Institute for Biomedical Innovation at Harbor-Ucla Medical Center	7	University of California, San Francisco	43

5 Continuing Grants

Number of new continuations this week: **2,857**

Cumulative number of new continuations identified since 3/17/2025: **16,685**

New Grants - Weekly					
Date Identified	Total	R Series	T Series	Early Career	Indiv. Training
2025-03-17	351	220	0	19	25
2025-03-24	290	172	0	23	12
2025-03-31	286	177	3	25	11
2025-04-07	2426	1570	6	193	92
2025-04-14	788	361	9	56	35
2025-04-21	674	283	11	30	32
2025-04-28	386	199	6	25	14
2025-05-05	3027	1761	42	190	70
2025-05-12	69	37	0	3	9
2025-05-19	367	196	6	9	22
2025-05-29	603	256	16	43	27
2025-06-03	200	76	6	10	11
2025-06-10	2710	1595	32	181	71
2025-06-17	439	227	7	12	8
2025-06-24	407	172	1	13	7
2025-07-01	805	226	29	61	15
2025-07-11	2857	1402	346	185	117

5.1 Commonly used words

The following table shows the **most commonly used words** in the abstracts and public health relevance statements among grants that newly received continuations.

Continued Grants - Most Common Words			
This Week	Count	Overall	Count
cell	473	cell	2628
training	406	cells	2259
cells	402	clinical	1815
clinical	355	cancer	1722
cancer	340	brain	1287
brain	203	core	1087
trainees	185	mechanisms	952
mechanisms	180	training	932
core	148	immune	868
immune	143	function	860

5.2 Grant Recipients

Continued Grants - Top Institutions			
This Week	Count	Overall	Count
University of Michigan at Ann Arbor	97	Johns Hopkins University	417
Washington University	85	University of Michigan at Ann Arbor	410
University of Pittsburgh at Pittsburgh	77	University of Pennsylvania	393
Stanford University	74	University of California, San Francisco	387
Johns Hopkins University	70	Washington University	387
University of Pennsylvania	69	University of Pittsburgh at Pittsburgh	371
Yale University	68	Stanford University	359
University of California, San Francisco	54	Yale University	356
Univ of North Carolina Chapel Hill	52	Massachusetts General Hospital	322
Massachusetts General Hospital	50	University of Washington	294

6 Currently Active Grants

There are **70,498** currently active NIH grants in RePORTER. Last week there were **79,995**.

6.1 Grant Recipients

All Active Grants - Top Institutions			
Organization	Count	Organization	Total Award (\$)
Johns Hopkins University	1,493	Leidos Biomedical Research, Inc.	1,450,041,408
University of Michigan at Ann Arbor	1,363	Division of Basic Sciences - Nci	1,113,783,480
University of California, San Francisco	1,361	New York University School of Medicine	890,693,091
University of Pennsylvania	1,299	Washington University	880,093,398
University of Pittsburgh at Pittsburgh	1,246	National Institute of Allergy and Infectious Diseases	877,607,043
Washington University	1,241	Johns Hopkins University	868,825,198
Yale University	1,189	University of California, San Francisco	802,393,571
Stanford University	1,185	Massachusetts General Hospital	729,782,682
Massachusetts General Hospital	1,109	University of Michigan at Ann Arbor	729,228,967
Univ of North Carolina Chapel Hill	1,041	Duke University	727,472,058
Duke University	996	University of Pennsylvania	725,881,962
Emory University	988	University of Pittsburgh at Pittsburgh	715,296,872
University of Washington	962	Stanford University	710,849,372
University of California, San Diego	948	Yale University	679,265,525
University of California Los Angeles	846	University of Washington	600,559,005
University of Minnesota	817	Univ of North Carolina Chapel Hill	586,319,110
University of Colorado Denver	793	Icahn School of Medicine at Mount Sinai	585,635,827
Icahn School of Medicine at Mount Sinai	782	Vanderbilt University Medical Center	554,627,059
Columbia University Health Sciences	743	Emory University	549,867,473
Brigham and Women's Hospital	711	University of California, San Diego	542,184,963

7 Methods

7.1 Definitions

Grant types are defined as:

- R series: R00, R01, R03, R15, R21
- T series: T01, T02, T09, T14, T15, T32, T34, T35, T37, T42, T90, TL1, TL4, TU2
- Early career: K00, K01, K02, K05, K06, K07, K08, K12, K14, K18, K21, K22, K23, K24, K25, K26, K30, K32, K38, K43, K76, K99, KD1, KL1, KL2, KM1
- Individual training: F30, F31, F32, R36

New grants are defined as those:

- with a Type 1 or 3 application type,
- that are listed as `is_new` in RePORTER, and
- that have not been previously identified as new

Continuing grants are defined as those:

- with a Type 2, 4, or 5 application type,
- that are listed as `is_new` in RePORTER, and
- that have not been previously identified as new

The `is_new` field indicates “whether a project is newly added to the system. A project is considered newly added only when the project is loaded in the past two data refreshes. Projects will not be considered as newly added projects after 3rd data refresh” (see RePORTER Data Dictionary [here](#)). “RePORTER data is refreshed each week (usually late Sunday nights) newly added projects generally available on Monday mornings. To be included in the weekly refresh the Budget Start Date of the funded award must have passed” per the RePORTER Frequently Asked Questions site [here](#).

7.2 Last updated

Terminated grants file downloaded 2025-07-11. Terminated grants data come from the NIH Rescinded Grants Database, which is run by Drs. Noam Ross and Scott Delaney. Data collection began 2025-03-07. Grant reinstatement fields were added to this database on 2025-05-12.

New grants file date last updated 2025-07-12. New grants data come from RePORTER. Data collection began 2025-03-17.

Currently active grants file downloaded 2025-07-12. Active grants data come from RePORTER.

7.3 Terminated Grants

The “`termination_date`” field from the NIH Rescinded Grants Database was used to determine date of termination. This field is a best approximation based on the following sources: the termination date in the HHS TAGGS Terminated grants PDF; the self-reported terminated date; and other signals from RePORTER and HHS TAGGS.

Termination date may occasionally be in the future if a recipient PI or institution has received a stop work order for an upcoming date. Termination date may also be missing in some circumstances.

7.4 Reinstated Grants

The “reinstated_est_date” field from the NIH Rescinded Grants Database was used to determine date of reinstatement. For more information on methods used to determine reinstatement, see grant-watch.us post [here](#).

7.5 State Data and Lost Funding

Total active, terminated, and new grants in the “Grants by State” table may not equal the total number of active, terminated, and new grants listed earlier in the report. This is because the former is limited to US states and DC only while the latter includes grants in US territories and other countries.

“Lost funding” is the amount of funding awarded to grants that was not paid out because of terminations. This value does not include funding for reinstated grants. Data to calculate lost funding come from USASpending.gov, which is updated approximately monthly. Values may not reflect changes to obligations (funding commitments) or outlays (funding disbursements) for the current month. The Department of Health and Human Services last updated data in USASpending.gov on 2025-07-01.

Percent of grants cut is calculated as: $(\text{total current terminations} / (\text{total current terminations} + \text{total current active grants})) * 100$. This calculation does not account for terminations that have not been reported. If there are unreported terminations in this state, the percent of grants cut listed in this document may be an *underestimation* the true percent of grants cut.

7.6 Text Analysis

The most common words were determined by first finding the top 10 most common words in each grant’s abstract and public health relevance statement. We then found the words that appear the most frequently on these Top 10 lists.

In addition to the standard excluded words for text mining (see [here](#)) and numbers, the following words were excluded: academic, activity, address, aim, aims, anti, approach, approaches, based, behavior, behaviors, care, content, critical, daily, data, design, develop, development, developments, disease, diseases, dr, e.g., e.g., effect, effects, factors, health, human, i.e, i.e., impact, improve, including, individuals, intervention, interventions, negative, outcomes, patient, patients, positive, program, project, research, science, specific, studies, study, test, tests, trial, trials.

For weeks with few terminated grants, word counts may be low. Words with equal counts are sorted alphabetically, which will bias the “Most Common Words” list towards alphabetically earlier words.

7.7 Resources

Find the latest confirmed terminations in the NIH Rescinded Grants Database [here](#).

Support this work by reporting terminated NIH grants [here](#). NSF grant terminations can be reported [here](#).
