Weekly Terminated NIH Grants Report

Date created: 2025-07-16

Contents

1 Introduction

This report presents an overview of recent trends in NIH grant terminations, reinstatements, new grant initiations, and continuations. It includes breakdowns by recipient institution and state.

Information on terminated grants comes from the NIH Rescinded Grants Database, maintained by Drs. Noam Ross and Scott Delaney. They collect data from self-report, news reports, the HHS TAGGS system, DOGE.gov, USASpending.gov, NIH's Twitter feed, and NIH RePORTER.

This report distinguishes between the following grant types.

- *R Series*: These grants fund **independent research projects** led by a principal investigator. These are the most common types of NIH grants. Funding goes towards research aims rather than training or career development.
- *T Series*: These grants go to **institutions** to support **training programs** for undergraduate, graduate, and postdoctoral researchers. A single T grant will support multiple trainees. These grants fund stipends, tuition, and training activities (e.g. courses, workshops, conferences).
- *Individual Training / Fellowships (F Series)*: These are research **training grants for individuals**, rather than institutions. The goal of these grants is to help predoctoral and postdoctoral trainees gain skills needed for a successful research career.
- *Early Career (K Series)*: These are grants for **individual researchers** (usually postdocs or early-career faculty) to help them become independent scientists. They provide salary support and research funding.

For resources and more information about these data, see the Methods section at the bottom of this document.

This report was created by Emma Mairson. For inquiries about this report, please contact Grant Watch at info@grant-watch.us or message us on Signal at sdelaney.84.

2 Grants by State

The following table breaks down active, terminated, reinstated, and new grants by state.

Ever terminated grants include all grants that were terminated at any point in time, regardless of whether they were later reinstated. Currently terminated grants exclude any grants that have been reinstated.

"Lost funding" is the amount of funding awarded to grants that was not paid out because of terminations. Percentages reflect the share of grants of that type in each state that have been terminated.

"Lost funding" and the values listed under "Number of grants terminated (%)" exclude reinstated grants.

So far, the total lost funding across all US states and DC is approximately **$2,185,131,000**.

Grants by State											
								Number of Grants Terminated (%)			
State	Active	Ever Term.	Curr. Term.	Reinst.	New	Cont.	Lost Funding (USD)	R Series	T Series	Early Career	Indiv. Train.

Wyoming	31	0	0	0	1	6	0	0 (0)	NA	NA	NA

Note:

NA = Not applicable; this state had no grants of this type, so terminations could not occur.

3 Terminated and Reinstated Grants

Number of confirmed terminated grants this week: **0** of 2,983 ever terminated and 2,019 currently terminated.

- R series: 0
- T series: 0
- Early career: 0
- Individual training: 0
- Reinstated: 0

The following table shows terminated grants by week, as listed in the "termination_date" field in the NIH Rescinded Grants Database. This field approximates a grant's date of termination based on the following sources: the termination date in the HHS TAGGS Terminated grants PDF; the self-reported termination date; and other signals from RePORTER and HHS TAGGS.

Ever terminated grants include all grants that were terminated in a given week, regardless of whether they were later reinstated. Currently terminated grants exclude any grants that have been reinstated. Reinstated grants are counted in the week they were estimated to be reinstated, not the week they were initially terminated.

Terminated Grants by Week							
Week	Ever Term.	Cur. Term.	Reinstated	R Series	T Series	Early Career	Indiv. Training

5.1 Commonly used words

The following table shows the **most commonly used words** in the abstracts and public health relevance statements among grants that newly received continuations.

Continued Grants - Most Common Words			
This Week	Count	Overall	Count
cell	220	cell	2848
clinical	213	cells	2451
training	199	clinical	2028
cells	192	cancer	1887
core	178	brain	1432
cancer	165	core	1265
brain	145	training	1131
function	94	mechanisms	1032
center	84	function	954
community	84	immune	941

5.2 Grant Recipients

Continued Grants - Top Institutions			
This Week	Count	Overall	Count
Columbia University Health Sciences	73	University of Michigan at Ann Arbor	450
University of California, San Francisco	55	Johns Hopkins University	449
University of Washington	41	University of California, San Francisco	447
University of California at Davis	40	University of Pennsylvania	434
University of Pennsylvania	40	Washington University	421
University of California, San Diego	39	University of Pittsburgh at Pittsburgh	408
University of Michigan at Ann Arbor	38	Stanford University	380
Northwestern University at Chicago	35	Yale University	376
University of California Los Angeles	34	Massachusetts General Hospital	347
University of Pittsburgh at Pittsburgh	33	University of Washington	336

6 Currently Active Grants

There are **72,771** currently active NIH grants in RePORTER. Last week there were **70,498**.

6.1 Grant Recipients

All Active Grants - Top Institutions			
Organization	Count	Organization	Total Award ($)
Johns Hopkins University	1,532	Leidos Biomedical Research, Inc.	1,465,672,294
University of California, San Francisco	1,428	Division of Basic Sciences - Nci	1,113,783,480
University of Michigan at Ann Arbor	1,408	Washington University	900,678,114
University of Pennsylvania	1,357	New York University School of Medicine	895,431,162
University of Pittsburgh at Pittsburgh	1,290	Johns Hopkins University	892,194,583
Washington University	1,279	National Institute of Allergy and Infectious Diseases	877,607,043
Yale University	1,215	University of California, San Francisco	842,114,511
Stanford University	1,210	University of Michigan at Ann Arbor	762,273,529
Massachusetts General Hospital	1,139	University of Pennsylvania	761,847,340
Univ of North Carolina Chapel Hill	1,058	Duke University	754,639,200
Duke University	1,023	University of Pittsburgh at Pittsburgh	745,113,534
Emory University	1,013	Massachusetts General Hospital	744,843,698
University of Washington	1,008	Stanford University	722,089,202
University of California, San Diego	1,003	Yale University	697,131,532
University of California Los Angeles	886	University of Washington	627,811,868
University of Minnesota	845	Icahn School of Medicine at Mount Sinai	600,219,729
Columbia University Health Sciences	822	Univ of North Carolina Chapel Hill	594,379,107
University of Colorado Denver	820	University of California, San Diego	577,948,839
Icahn School of Medicine at Mount Sinai	809	Emory University	563,546,599
Brigham and Women's Hospital	717	Vanderbilt University Medical Center	561,487,705

7 Methods

7.1 Definitions

Grant types are defined as:

- R series: R00, R01, R03, R15, R21
- T series: T01, T02, T09, T14, T15, T32, T34, T35, T37, T42, T90, TL1, TL4, TU2
- Early career: K00, K01, K02, K05, K06, K07, K08, K12, K14, K18, K21, K22, K23, K24, K25, K26, K30, K32, K38, K43, K76, K99, KD1, KL1, KL2, KM1
- Individual training: F30, F31, F32, R36

New grants are defined as those:

- with a Type 1 or 3 application type,
- that are listed as is_new in RePORTER, and
- that have not been previously identified as new

Continuing grants are defined as those:

- with a Type 2, 4, or 5 application type,
- that are listed as is_new in RePORTER, and
- that have not been previously identified as new

The is_new field indicates "whether a project is newly added to the system. A project is considered newly added only when the project is loaded in the past two data refreshes. Projects will not be considered as newly added projects after 3rd data refresh" (see RePORTER Data Dictionary here). "RePORTER data is refreshed each week (usually late Sunday nights) newly added projects generally available on Monday mornings. To be included in the weekly refresh the Budget Start Date of the funded award must have passed" per the RePORTER Frequently Asked Questions site here.

Learn more about NIH application types here.

Learn more about NIH activity codes here.

7.2 Last updated

Terminated grants file downloaded 2025-07-14. Terminated grants data come from the NIH Rescinded Grants Database, which is run by Drs. Noam Ross and Scott Delaney. Data collection began 2025-03-07. Grant reinstatement fields were added to this database on 2025-05-12.

New grants file date last updated 2025-07-14. New grants data come from RePORTER. Data collection began 2025-03-17.

Currently active grants file downloaded 2025-07-14. Active grants data come from RePORTER.

7.3 Terminated Grants

The "termination_date" field from the NIH Rescinded Grants Database was used to determine date of termination. This field is a best approximation based on the following sources: the termination date in the HHS TAGGS Terminated grants PDF; the self-reported terminated date; and other signals from RePORTER and HHS TAGGS.

Termination date may occasionally be in the future if a recipient PI or institution has received a stop work order for an upcoming date. Termination date may also be missing in some circumstances.

7.4   Reinstated Grants

The "reinstated_est_date" field from the NIH Rescinded Grants Database was used to determine date of reinstatement. For more information on methods used to determine reinstatement, see grant-watch.us post here.

7.5   State Data and Lost Funding

Total active, terminated, and new grants in the "Grants by State" table may not equal the total number of active, terminated, and new grants listed earlier in the report. This is because the former is limited to US states and DC only while the latter includes grants in US territories and other countries.

"Lost funding" is the amount of funding awarded to grants that was not paid out because of terminations. This value does not include funding for reinstated grants. Data to calculate lost funding come from US-ASpending.gov, which is updated approximately monthly. Values may not reflect changes to obligations (funding commitments) or outlays (funding disbursements) for the current month. The Department of Health and Human Services last updated data in USASpending.gov on 2025-07-01.

Percent of grants cut is calculated as: (total current terminations / (total current terminations + total current active grants)) * 100. This calculation does not account for terminations that have not been reported. If there are unreported terminations in this state, the percent of grants cut listed in this document may be an *underestimation* the true percent of grants cut.

7.6   Text Analysis

The most common words were determined by first finding the top 10 most common words in each grant's abstract and public health relevance statement. We then found the words that appear the most frequently on these Top 10 lists.

In addition to the standard excluded words for text mining (see here) and numbers, the following words were excluded: academic, activity, address, aim, aims, anti, approach, approaches, based, behavior, behaviors, care, content, critical, daily, data, design, develop, development, developments, disease, diseases, dr, e.g, e.g., effect, effects, factors, health, human, i.e, i.e., impact, improve, including, individuals, intervention, interventions, negative, outcomes, patient, patients, positive, program, project, research, science, specific, studies, study, test, tests, trial, trials.

For weeks with few terminated grants, word counts may be low. Words with equal counts are sorted alphabetically, which will bias the "Most Common Words" list towards alphabetically earlier words.

7.7   Resources

Find the latest confirmed terminations in the NIH Rescinded Grants Database here.

Support this work by reporting terminated NIH grants here. NSF grant terminations can be reported here.
