Weekly Terminated NIH Grants Report

Date created: 2025-07-16

Contents

1   Introduction

This report presents an overview of recent trends in NIH grant terminations, reinstatements, new grant initiations, and continuations. It includes breakdowns by recipient institution and state.

Information on terminated grants comes from the NIH Rescinded Grants Database, maintained by Drs. Noam Ross and Scott Delaney. They collect data from self-report, news reports, the HHS TAGGS system, DOGE.gov, USASpending.gov, NIH's Twitter feed, and NIH RePORTER.

This report distinguishes between the following grant types.

- *R Series*: These grants fund **independent research projects** led by a principal investigator. These are the most common types of NIH grants. Funding goes towards research aims rather than training or career development.
- *T Series*: These grants go to **institutions** to support **training programs** for undergraduate, graduate, and postdoctoral researchers. A single T grant will support multiple trainees. These grants fund stipends, tuition, and training activities (e.g. courses, workshops, conferences).
- *Individual Training / Fellowships (F Series)*: These are research **training grants for individuals**, rather than institutions. The goal of these grants is to help predoctoral and postdoctoral trainees gain skills needed for a successful research career.
- *Early Career (K Series)*: These are grants for **individual researchers** (usually postdocs or early-career faculty) to help them become independent scientists. They provide salary support and research funding.

For resources and more information about these data, see the Methods section at the bottom of this document.

This report was created by Emma Mairson. For inquiries about this report, please contact Grant Watch at info@grant-watch.us or message us on Signal at sdelaney.84.

2 Grants by State

The following table breaks down active, terminated, reinstated, and new grants by state.

Ever terminated grants include all grants that were terminated at any point in time, regardless of whether they were later reinstated. Currently terminated grants exclude any grants that have been reinstated.

"Lost funding" is the amount of funding awarded to grants that was not paid out because of terminations. Percentages reflect the share of grants of that type in each state that have been terminated.

"Lost funding" and the values listed under "Number of grants terminated (%)" exclude reinstated grants.

So far, the total lost funding across all US states and DC is approximately **$2,116,283,000**.

Grants by State										
								Number of Grants Terminated (%)			
State	Active	Ever Term.	Curr. Term.	Reinst.	New	Cont.	Lost Funding (USD)	R Series	T Series	Early Career	Indiv. Train.
Alabama	838	24	22	2	35	239	18,301,173	6 (1.3)	3 (15)	0 (0)	5 (14.7)

Wyoming	31	0	0	0	1	6	0	0 (0)	NA	NA	NA

Note:

NA = Not applicable; this state had no grants of this type, so terminations could not occur.

3   Terminated and Reinstated Grants

Number of confirmed terminated grants this week: **1** of 3,021 ever terminated and 1,912 currently terminated.

- R series: 0
- T series: 0
- Early career: 0
- Individual training: 1
- Reinstated: 0

The following table shows terminated grants by week, as listed in the "termination_date" field in the NIH Rescinded Grants Database. This field approximates a grant's date of termination based on the following sources: the termination date in the HHS TAGGS Terminated grants PDF; the self-reported termination date; and other signals from RePORTER and HHS TAGGS.

Ever terminated grants include all grants that were terminated in a given week, regardless of whether they were later reinstated. Currently terminated grants exclude any grants that have been reinstated. Reinstated grants are counted in the week they were estimated to be reinstated, not the week they were initially terminated.

Terminated Grants by Week							
Week	Ever Term.	Cur. Term.	Reinstated	R Series	T Series	Early Career	Indiv. Training
2025-02-24	17	8	0	6	0	0	0

3.1   Commonly used words - Terminated grants

The following table shows the **most commonly used words** in the abstracts and public health relevance statements for this weeks' and overall ever terminated grants.

Terminated Grants - Most Common Words			
This Week	Count	Overall	Count
access	1	cell	334
composition	1	training	330
drinking	1	students	285
exposure	1	cells	278
exposures	1	biomedical	263
gut	1	hiv	237
life	1	risk	216
microbiome	1	community	208
quality	1	cancer	170
water	1	clinical	170
		brain	158
		disparities	151
		social	131
		mechanisms	116
		immune	113
		treatment	113
		career	110
		aging	106
		trainees	105
		function	104

3.2 Commonly used words - Reinstated grants

The following table shows the **most commonly used words** in the abstracts and public health relevance statements for all reinstated grants.

Reinstated Grants - Most Common Words	
Word	Count
training	126
hiv	120
students	116
community	111
biomedical	105
cell	98
risk	89
clinical	78
cells	70
disparities	70

5.1 Commonly used words

The following table shows the **most commonly used words** in the abstracts and public health relevance statements among grants that newly received continuations.

Continued Grants - Most Common Words			
This Week	Count	Overall	Count
clinical	256	cell	3028
training	208	cells	2589
cancer	199	clinical	2284
cell	180	cancer	2086
core	150	brain	1520
cells	138	core	1415
risk	110	training	1339
support	92	mechanisms	1087
community	90	risk	1046
brain	88	immune	1015

5.2 Grant Recipients

Continued Grants - Top Institutions			
This Week	Count	Overall	Count
University of California, San Francisco	79	University of California, San Francisco	530
University of Washington	70	Johns Hopkins University	500
University of California Los Angeles	65	University of Michigan at Ann Arbor	473
Columbia University Health Sciences	52	University of Pennsylvania	449
Johns Hopkins University	50	Washington University	441
Stanford University	46	University of Pittsburgh at Pittsburgh	429
Oregon Health & Science University	45	Stanford University	427
Northwestern University at Chicago	44	University of Washington	410
University of California, San Diego	44	Yale University	388
Case Western Reserve University	38	Massachusetts General Hospital	367

6 Currently Active Grants

There are **74,959** currently active NIH grants in RePORTER. Last week there were **72,771**.

6.1 Grant Recipients

All Active Grants - Top Institutions			
Organization	Count	Organization	Total Award ($)
Johns Hopkins University	1,590	Leidos Biomedical Research, Inc.	1,465,672,294
University of California, San Francisco	1,523	Division of Basic Sciences - Nci	1,113,783,480
University of Michigan at Ann Arbor	1,436	Johns Hopkins University	928,673,524
University of Pennsylvania	1,383	University of California, San Francisco	919,278,498
University of Pittsburgh at Pittsburgh	1,320	Washington University	912,850,163
Washington University	1,303	New York University School of Medicine	902,167,445
Stanford University	1,261	National Institute of Allergy and Infectious Diseases	877,607,043
Yale University	1,240	University of Pennsylvania	782,941,098
Massachusetts General Hospital	1,166	University of Michigan at Ann Arbor	775,340,422
Univ of North Carolina Chapel Hill	1,087	Duke University	767,067,463
University of Washington	1,082	Massachusetts General Hospital	766,306,649
University of California, San Diego	1,068	University of Pittsburgh at Pittsburgh	762,806,939
Duke University	1,040	Stanford University	758,026,639
Emory University	1,036	Yale University	728,036,950
University of California Los Angeles	964	University of Washington	671,422,781
University of Minnesota	895	Univ of North Carolina Chapel Hill	623,713,456
Columbia University Health Sciences	882	University of California, San Diego	621,885,916
University of Colorado Denver	863	Icahn School of Medicine at Mount Sinai	612,204,406
Icahn School of Medicine at Mount Sinai	823	Vanderbilt University Medical Center	581,478,553
Brigham and Women's Hospital	742	Emory University	580,089,458

7 Methods

7.1 Definitions

Grant types are defined as:

- R series: R00, R01, R03, R15, R21
- T series: T01, T02, T09, T14, T15, T32, T34, T35, T37, T42, T90, TL1, TL4, TU2
- Early career: K00, K01, K02, K05, K06, K07, K08, K12, K14, K18, K21, K22, K23, K24, K25, K26, K30, K32, K38, K43, K76, K99, KD1, KL1, KL2, KM1
- Individual training: F30, F31, F32, R36

New grants are defined as those:

- with a Type 1 or 3 application type,
- that are listed as is_new in RePORTER, and
- that have not been previously identified as new

Continuing grants are defined as those:

- with a Type 2, 4, or 5 application type,
- that are listed as is_new in RePORTER, and
- that have not been previously identified as new

The is_new field indicates "whether a project is newly added to the system. A project is considered newly added only when the project is loaded in the past two data refreshes. Projects will not be considered as newly added projects after 3rd data refresh" (see RePORTER Data Dictionary here). "RePORTER data is refreshed each week (usually late Sunday nights) newly added projects generally available on Monday mornings. To be included in the weekly refresh the Budget Start Date of the funded award must have passed" per the RePORTER Frequently Asked Questions site here.

Learn more about NIH application types here.

Learn more about NIH activity codes here.

7.2 Last updated

Terminated grants file downloaded 2025-07-23. Terminated grants data come from the NIH Rescinded Grants Database, which is run by Drs. Noam Ross and Scott Delaney. Data collection began 2025-03-07. Grant reinstatement fields were added to this database on 2025-05-12.

New grants file date last updated 2025-07-23. New grants data come from RePORTER. Data collection began 2025-03-17.

Currently active grants file downloaded 2025-07-23. Active grants data come from RePORTER.

7.3 Terminated Grants

The "termination_date" field from the NIH Rescinded Grants Database was used to determine date of termination. This field is a best approximation based on the following sources: the termination date in the HHS TAGGS Terminated grants PDF; the self-reported terminated date; and other signals from RePORTER and HHS TAGGS.

Termination date may occasionally be in the future if a recipient PI or institution has received a stop work order for an upcoming date. Termination date may also be missing in some circumstances.

7.4 Reinstated Grants

The "reinstated_est_date" field from the NIH Rescinded Grants Database was used to determine date of reinstatement. For more information on methods used to determine reinstatement, see grant-watch.us post here.

7.5 State Data and Lost Funding

Total active, terminated, and new grants in the "Grants by State" table may not equal the total number of active, terminated, and new grants listed earlier in the report. This is because the former is limited to US states and DC only while the latter includes grants in US territories and other countries.

"Lost funding" is the amount of funding awarded to grants that was not paid out because of terminations. This value does not include funding for reinstated grants. Data to calculate lost funding come from USASpending.gov, which is updated approximately monthly. Values may not reflect changes to obligations (funding commitments) or outlays (funding disbursements) for the current month. The Department of Health and Human Services last updated data in USASpending.gov on 2025-07-01.

Percent of grants cut is calculated as: (total current terminations / (total current terminations + total current active grants)) * 100. This calculation does not account for terminations that have not been reported. If there are unreported terminations in this state, the percent of grants cut listed in this document may be an *underestimation* the true percent of grants cut.

7.6 Text Analysis

The most common words were determined by first finding the top 10 most common words in each grant's abstract and public health relevance statement. We then found the words that appear the most frequently on these Top 10 lists.

In addition to the standard excluded words for text mining (see here) and numbers, the following words were excluded: academic, activity, address, aim, aims, anti, approach, approaches, based, behavior, behaviors, care, content, critical, daily, data, design, develop, development, developments, disease, diseases, dr, e.g, e.g., effect, effects, factors, health, human, i.e, i.e., impact, improve, including, individuals, intervention, interventions, negative, outcomes, patient, patients, positive, program, project, research, science, specific, studies, study, test, tests, trial, trials.

For weeks with few terminated grants, word counts may be low. Words with equal counts are sorted alphabetically, which will bias the "Most Common Words" list towards alphabetically earlier words.

7.7 Resources

Find the latest confirmed terminations in the NIH Rescinded Grants Database here.

Support this work by reporting terminated NIH grants here. NSF grant terminations can be reported here.
