Weekly Terminated NIH Grants Report

Date created: 2025-07-30

Contents

1 Introduction

This report presents an overview of recent trends in NIH grant terminations, reinstatements, new grant initiations, and continuations. It includes breakdowns by recipient institution and state.

Information on terminated grants comes from the NIH Rescinded Grants Database, maintained by Drs. Noam Ross and Scott Delaney. They collect data from self-report, news reports, the HHS TAGGS system, DOGE.gov, USASpending.gov, NIH's Twitter feed, and NIH RePORTER.

This report distinguishes between the following grant types.

- *R Series*: These grants fund **independent research projects** led by a principal investigator. These are the most common types of NIH grants. Funding goes towards research aims rather than training or career development.
- *T Series*: These grants go to **institutions** to support **training programs** for undergraduate, graduate, and postdoctoral researchers. A single T grant will support multiple trainees. These grants fund stipends, tuition, and training activities (e.g. courses, workshops, conferences).
- *Individual Training / Fellowships (F Series)*: These are research **training grants for individuals**, rather than institutions. The goal of these grants is to help predoctoral and postdoctoral trainees gain skills needed for a successful research career.
- *Early Career (K Series)*: These are grants for **individual researchers** (usually postdocs or early-career faculty) to help them become independent scientists. They provide salary support and research funding.

For resources and more information about these data, see the Methods section at the bottom of this document.

This report was created by Emma Mairson. For inquiries about this report, please contact Grant Watch at info@grant-watch.us or message us on Signal at sdelaney.84.

2 Grants by State

The following table breaks down active, terminated, reinstated, and new grants by state.

Ever terminated grants include all grants that were terminated at any point in time, regardless of whether they were later reinstated. Currently terminated grants exclude any grants that have been reinstated.

"Lost funding" is the amount of funding awarded to grants that was not paid out because of terminations. Percentages reflect the share of grants of that type in each state that have been terminated.

"Lost funding" and the values listed under "Number of grants terminated (%)" exclude reinstated grants.

So far, the total lost funding across all US states and DC is approximately **$2,148,660,000**.

State	Active	Ever Term.	Curr. Term.	Reinst.	New	Cont.	Lost Funding (USD)	R Series	T Series	Early Career	Indiv. Train.
Alabama	848	24	22	2	35	249	18,282,005	6 (1.3)	3 (15)	0 (0)	5 (14.7)

Wyoming	31	0	0	0	1	6	0	0 (0)	NA	NA	NA

Note:

NA = Not applicable; this state had no grants of this type, so terminations could not occur.

3 Terminated and Reinstated Grants

Number of confirmed terminated grants this week: **1** of 3,028 ever terminated and 1,942 currently terminated.

- R series: 0
- T series: 0
- Early career: 0
- Individual training: 0
- Reinstated: 0

The following table shows terminated grants by week, as listed in the "termination_date" field in the NIH Rescinded Grants Database. This field approximates a grant's date of termination based on the following sources: the termination date in the HHS TAGGS Terminated grants PDF; the self-reported termination date; and other signals from RePORTER and HHS TAGGS.

Ever terminated grants include all grants that were terminated in a given week, regardless of whether they were later reinstated. Currently terminated grants exclude any grants that have been reinstated. Reinstated grants are counted in the week they were estimated to be reinstated, not the week they were initially terminated.

Terminated Grants by Week							
Week	Ever Term.	Cur. Term.	Reinstated	R Series	T Series	Early Career	Indiv. Training

5.1 Commonly used words

The following table shows the **most commonly used words** in the abstracts and public health relevance statements among grants that newly received continuations.

Continued Grants - Most Common Words			
This Week	Count	Overall	Count
clinical	168	cell	3195
cell	167	cells	2716
core	152	clinical	2452
training	133	cancer	2150
cells	127	brain	1591
risk	89	core	1567
community	75	training	1472
brain	71	mechanisms	1135
cancer	64	risk	1135
center	62	immune	1065

5.2 Grant Recipients

Continued Grants - Top Institutions			
This Week	Count	Overall	Count
University of Colorado Denver	43	University of California, San Francisco	569
University of California Los Angeles	36	Johns Hopkins University	526
University of California, San Francisco	35	University of Michigan at Ann Arbor	493
Columbia University Health Sciences	34	University of Pennsylvania	465
Northwestern University at Chicago	32	University of Pittsburgh at Pittsburgh	455
Massachusetts General Hospital	29	Washington University	455
Johns Hopkins University	26	Stanford University	447
University of Pittsburgh at Pittsburgh	25	University of Washington	426
Yale University	24	Yale University	413
University of Wisconsin-Madison	23	Massachusetts General Hospital	398

6 Currently Active Grants

There are **76,656** currently active NIH grants in RePORTER. Last week there were **74,959**.

6.1 Grant Recipients

All Active Grants - Top Institutions			
Organization	Count	Organization	Total Award ($)
Johns Hopkins University	1,630	Leidos Biomedical Research, Inc.	1,465,672,294
University of California, San Francisco	1,573	Division of Basic Sciences - Nci	1,113,783,480
University of Michigan at Ann Arbor	1,461	University of California, San Francisco	957,037,606
University of Pennsylvania	1,401	Johns Hopkins University	950,599,421
University of Pittsburgh at Pittsburgh	1,346	Washington University	923,311,980
Washington University	1,320	New York University School of Medicine	912,322,088
Stanford University	1,283	National Institute of Allergy and Infectious Diseases	880,425,680
Yale University	1,276	University of Pennsylvania	796,909,110
Massachusetts General Hospital	1,200	Massachusetts General Hospital	792,530,600
Univ of North Carolina Chapel Hill	1,102	University of Michigan at Ann Arbor	789,198,344
University of Washington	1,101	Duke University	780,069,767
University of California, San Diego	1,100	University of Pittsburgh at Pittsburgh	777,036,278
Duke University	1,062	Stanford University	768,720,475
Emory University	1,059	Yale University	755,785,028
University of California Los Angeles	1,006	University of Washington	682,801,181
University of Colorado Denver	921	Univ of North Carolina Chapel Hill	650,185,473
Columbia University Health Sciences	920	University of California, San Diego	638,758,219
University of Minnesota	913	Icahn School of Medicine at Mount Sinai	621,146,499
Icahn School of Medicine at Mount Sinai	842	Emory University	603,915,848
University of Wisconsin-Madison	765	Columbia University Health Sciences	599,422,563

7 Methods

7.1 Definitions

Grant types are defined as:

- R series: R00, R01, R03, R15, R21
- T series: T01, T02, T09, T14, T15, T32, T34, T35, T37, T42, T90, TL1, TL4, TU2
- Early career: K00, K01, K02, K05, K06, K07, K08, K12, K14, K18, K21, K22, K23, K24, K25, K26, K30, K32, K38, K43, K76, K99, KD1, KL1, KL2, KM1
- Individual training: F30, F31, F32, R36

New grants are defined as those:

- with a Type 1 or 3 application type,
- that are listed as is_new in RePORTER, and
- that have not been previously identified as new

Continuing grants are defined as those:

- with a Type 2, 4, or 5 application type,
- that are listed as is_new in RePORTER, and
- that have not been previously identified as new

The is_new field indicates "whether a project is newly added to the system. A project is considered newly added only when the project is loaded in the past two data refreshes. Projects will not be considered as newly added projects after 3rd data refresh" (see RePORTER Data Dictionary here). "RePORTER data is refreshed each week (usually late Sunday nights) newly added projects generally available on Monday mornings. To be included in the weekly refresh the Budget Start Date of the funded award must have passed" per the RePORTER Frequently Asked Questions site here.

Learn more about NIH application types here.

Learn more about NIH activity codes here.

7.2 Last updated

Terminated grants file downloaded 2025-07-30. Terminated grants data come from the NIH Rescinded Grants Database, which is run by Drs. Noam Ross and Scott Delaney. Data collection began 2025-03-07. Grant reinstatement fields were added to this database on 2025-05-12.

New grants file date last updated 2025-07-30. New grants data come from RePORTER. Data collection began 2025-03-17.

Currently active grants file downloaded 2025-07-30. Active grants data come from RePORTER.

7.3 Terminated Grants

The "termination_date" field from the NIH Rescinded Grants Database was used to determine date of termination. This field is a best approximation based on the following sources: the termination date in the HHS TAGGS Terminated grants PDF; the self-reported terminated date; and other signals from RePORTER and HHS TAGGS.

Termination date may occasionally be in the future if a recipient PI or institution has received a stop work order for an upcoming date. Termination date may also be missing in some circumstances.

7.4 Reinstated Grants

The "reinstated_est_date" field from the NIH Rescinded Grants Database was used to determine date of reinstatement. For more information on methods used to determine reinstatement, see grant-watch.us post here.

7.5 State Data and Lost Funding

Total active, terminated, and new grants in the "Grants by State" table may not equal the total number of active, terminated, and new grants listed earlier in the report. This is because the former is limited to US states and DC only while the latter includes grants in US territories and other countries.

"Lost funding" is the amount of funding awarded to grants that was not paid out because of terminations. This value does not include funding for reinstated grants. Data to calculate lost funding come from USASpending.gov, which is updated approximately monthly. Values may not reflect changes to obligations (funding commitments) or outlays (funding disbursements) for the current month. The Department of Health and Human Services last updated data in USASpending.gov on 2025-07-01.

Percent of grants cut is calculated as: (total current terminations / (total current terminations + total current active grants)) * 100. This calculation does not account for terminations that have not been reported. If there are unreported terminations in this state, the percent of grants cut listed in this document may be an *underestimation* the true percent of grants cut.

7.6 Text Analysis

The most common words were determined by first finding the top 10 most common words in each grant's abstract and public health relevance statement. We then found the words that appear the most frequently on these Top 10 lists.

In addition to the standard excluded words for text mining (see here) and numbers, the following words were excluded: academic, activity, address, aim, aims, anti, approach, approaches, based, behavior, behaviors, care, content, critical, daily, data, design, develop, development, developments, disease, diseases, dr, e.g, e.g., effect, effects, factors, health, human, i.e, i.e., impact, improve, including, individuals, intervention, interventions, negative, outcomes, patient, patients, positive, program, project, research, science, specific, studies, study, test, tests, trial, trials.

For weeks with few terminated grants, word counts may be low. Words with equal counts are sorted alphabetically, which will bias the "Most Common Words" list towards alphabetically earlier words.

7.7 Resources

Find the latest confirmed terminations in the NIH Rescinded Grants Database here.

Support this work by reporting terminated NIH grants here. NSF grant terminations can be reported here.
